Problem

Traditional organizations and Web3 communities still encounter issues such as voter apathy, plutocracy (where the wealthy have more influence), and the potential for manipulation or collusion among members, and they encounter difficulties in scaling operations and coordination.

Governance challenges like voter apathy and manipulation.

Transparency issues persist in decision-making processes

Struggle with scaling operations and coordination as they grow

Plutocracy, where wealth influences decisions, is a shared issue

Balancing decentralization with effective governance poses a common dilemma
